## E215-433

Three way integrated speaker

### E215-433

This three way integrated speaker offers an amazing quality of sound reproduction.

The low frequencies are reproduced by two 15" (38cm) speakers with 4" moving coils, the mid-range way uses a 10" (26cm) speaker with a 3" moving coil guided by a horn with an exponential profile, which brings a great wealth of information, and a high frequency speaker via a 2" driver with a 3" moving coil guided by a constant directivity horn. The low and mid-range speakers are exclusive models designed by DKaudio

The E215-433 will easily fit behind a screen and will offer first class sound.

This three way speaker comes with a passive filtering between the low-mid range and a mid-high range driver (three ways bi-amp), which lets you replace the traditional two way bi-amp without having to withdraw lines of speakers and therefore improving the quality of the sound diffusion at a realistic cost.

However it can be delivered as a three way tri-amp and even, upon request, as a mono-amp with built-in passive filtering.

## E215-433

### TECHNICAL SPECIFICATIONS

Range: **22.95 meters**

Room size (seats): **50 to 300**

Impedance: **4 ohms / 8 ohms**

Power capacity: **1200 / 350 Watts AES**

Efficiency: **101 / 103 dB/1W/1m**

Bandwidth: **35Hz to 18kHz**

Low frequency speakers: **2 x 15" - 4" moving coil**

Mid-range speaker: **10" - 3" moving coil – Exponential horn**

High frequency driver: **2" - 3" moving coil**

Directivity: **90° x 40°**

Dim. H x W x D: **1520 x 698 x 465mm**

Weight: **99.70kg**
